Rhozet and Crispin Team Up to Deliver Faster-Than-Realtime Transcoding in Automated Production Environments

San Jose, California, April 25, 2006. The Rhozet Corporation announced today that it has entered into a partnership with Crispin Corporation to provide media transcoding support for Crispin's line of broadcast automation tools. The Rhozet technology will be integrated into Crispin's System 2000 suite of applications to provide a complete "any in, any out" automated media workflow. System 2000 is a suite of applications designed to provide complete control over an automated broadcast environment.

"Broadcasters around the world depend on Crispin automation to manage the flow of disparate media throughout their facility," said Dave Neal, CEO of Crispin. "By adding Rhozet transcoding capability to our offerings, we'll be able to provide an additional level of flexibility to our customers that utilize various devices and multiple media formats."

"We are very excited to be working with Crispin," said David Trescot, CEO of Rhozet. "As the leader in broadcast automation, Crispin is an ideal partner. Their IP-based architecture fits perfectly with Rhozet's software-only distributed encoding solution. Both run on off-the-shelf hardware and can distribute control throughout a facility or across the globe."

The integration between Rhozet and Crispin will be demonstrated at Crispin's booth during the upcoming NAB tradeshow in booth #SU608.

About Crispin Corporation

Founded in 1997, Crispin Corporation is a leading worldwide provider of broadcast automation software, equipment, services and support. Modular in design, Crispin's flexible systems help small to large-scale facilities develop and customize cost-effective solutions designed to connect elements from existing and new systems into one, integrated, easy-to-use solution.

Based in Durham, NC, with regional sales offices located throughout the United States, Crispin offers automation solutions to over 370 broadcast facilities worldwide. For more information, contact Crispin at (919) 845-7744 or visit us on the Web at <http://www.crispincorp.com>.
