

DALET SELECTS HARMONIC'S RHOZET™ TRANSCODING TECHNOLOGY

– Integration of Rhozet Carbon Coder and Dalet Asset Management Solutions Facilitates Cross-Platform Content Distribution at The Press Association –

SUNNYVALE, CALIF — MAY 29, 2008 — Harmonic Inc. (NASDAQ: HLIT) today announced that its Rhozet™ Carbon Coder™ video transcoding solution has been selected by Dalet Digital Media Systems for integration with the full range of Dalet asset management and broadcast solutions. Dalet's file-based solutions offer end-to-end digital workflows--from ingest to production, editing, scheduling, transmission, archiving and content distribution. The Dalet - Rhozet integration is deployed at The Press Association, the national news agency for the United Kingdom and Ireland, for efficient production and management of video packages which are distributed to affiliates via The Press Association's web portal.

Video journalists in the field edit video using their laptops and upload finished packages to headquarters using a customized store-and-forward video hub application developed using Rhozet video transcoding technology. Since burdensome transcoding and publishing functions are handled behind-the-scenes, journalists can focus their attention on content rather than on repetitive tasks.

"We're impressed with the Rhozet transcoding capabilities and the ease in which we have been able to integrate these capabilities with the Dalet core engine to meet the requirements of our customers," said Kevin Savina, Director of Product Management at Dalet Digital Media Systems.

"Dalet's proven technology is used by major broadcasters and content providers to facilitate the management of video assets," said David Trescot, Vice President of the Rhozet Business Unit at Harmonic Inc. "Carbon Coder transcoding technology expands their offering by providing a significant increase in workflow efficiencies for these customers."

Harmonic's Rhozet Carbon Coder is a universal transcoding application that facilitates the transfer of media between a variety of platforms, including acquisition, editing, playout, archive, the Internet and mobile devices. Carbon Coder can run as a stand-alone application or as part of a multi-node, fully-automated rendering farm. Carbon Coder provides high-performance, scalable and cost-effective transcoding for a broad range of business environments, from specialized studios to enterprise-scale installations.

About Dalet Digital Media Systems

Dalet is a worldwide leader in software that empowers broadcasters and content professionals to produce and manage audio and video content in a digital, multi-platform world. Dalet media asset management (MAM) solutions streamline production costs and increases revenue opportunities by simplifying the distribution of rich-media assets across both interactive and traditional platforms.

Dalet tools are used around the world by thousands of content producers including major television and radio public broadcasters (BBC, CBC, DR, NPR, RFI, Russia Today, RTM, VOA,

WDR), commercial networks (ART, eTV, Grupo Prisa, Prime Television, The Press Association, Warner Bros., XM Satellite) and government organizations (Queensland JAG, Canadian House of Commons, The European Commission).

Dalet is traded on the NYSE-EURONEXT stock exchange (Eurolist C): ISIN: FR0000076176, Bloomberg DLT:FP, Reuters: DALE.PA.
